I'm seeking a full-time position as a Software Engineer. I have 3 years of professional experience developing the best quality secure web applications, and I have experience in Azure development. I also have a Bachelor of Science in Computer Science, and have additional experience from internships, bootcamps, hackathons, and personal projects. I'm a dedicated and hardworking person who is both an independent learner and a team player, and can quickly adapt to different environments and situations. I am also willing to learn any new languages and technologies.

PROFESSIONAL EXPERIENCE

Software Developer at Houlihan Lokey (July 2023 - Present)

- Built and maintained backend and frontend features for **VAULT**, a secure RBAC platform used by internal banking teams for accessing company-specific assets, and improved load times through asynchronous background handlers and image caching.
- Implemented **SSL-based activity logging** to support analytics and compliance.
- Optimized **Logo Architect**, a web application built in-house as a replacement for LogoIntern, reducing load time for 10,000+ records from 2 minutes to 15 seconds using client-side pagination and async image loading.
- Designed and maintained **SharePointToBlobMigrator**, an Azure Function App using Graph API delta queries, chunked uploads, an orchestrator with activity triggers, and a global lock mechanism to prevent race conditions and deadlocks.
- Refactored redundant logic into reusable components, improving maintainability across systems.

Software Engineer at Flowductive (June 2022 - July 2023)

- Developed core features for a productivity web application, including authentication, onboarding flows, and error-handling systems.
- Built React components and integrated Firebase authentication and data services.
- Collaborated with product and design teams in an Agile environment to deliver user-focused features.

EDUCATION

California State University, Northridge (August 2017 - December 2021)

Bachelor of Science in Computer Science

- Graduated with Honors
- Dean's List recognition for multiple semesters for good academic achievements/performance

SKILLS

- **Languages:** C#, JavaScript, TypeScript, Java, PHP, HTML, CSS
- **Frameworks:** ASP.NET, .NET Core, Vue.js, React.js, Node.js, Laravel, Bootstrap
- **Database:** SQL Server, Azure SQL Managed Instance, SQL, MySQL, PostgreSQL
- **Cloud Technologies:** Microsoft Azure, GitHub Pages, Firebase, Heroku
- **Development Process:** Git, GitHub, Bitbucket, Visual Studio, NPM, Postman, NuGet, Homebrew, Microsoft SQL Server Management Studio, Azure Portal, Agile, RESTful APIs, Windows, Linux

KEY ATTRIBUTES

- End-to-end feature ownership and strong problem-solving skills.
- Experience with distributed systems and background processing.
- Familiarity with cloud-native architectures and microservice-ready patterns.
- Strong communication skills and ability to collaborate across teams.
- Passion for continuous learning and modernizing legacy systems.
